### Recommendation

The superintendent of schools recommends the USD 369 board of education adopt the student enrollment projection in Table 1.7 and the nonresident enrollment seats in the grades and schools identified in Table 1.8 in this report.

\* Or, consider recommending the BOE adopt/approve the report as a whole.

### Nonresident Enrollment Process & Timeline

\* Consider submitting district preferences from the list below but do not include in the report

The district will accept nonresident student enrollment applications between June 1, 2024 and June 30, 2024.

The application may **not** request information regarding the student's ethnicity, national origin, gender, income level, disabling condition (IEP), English language proficiency, measure of achievement, aptitude, or athletic ability.

All eligible nonresident students who completed the application process following the district's guidelines will be accepted as students if capacity exists and if they are not currently suspended or expelled from their current school district.

When the number of nonresident enrollment applications exceeds the school building, program, or grade level capacity, the district will randomly select students through a confidential lottery process conducted by the superintendent or designee between July 1 and July 15.

Districts may contact students and their families during the lottery process to confirm enrollment location and confirm acceptance. The nonresident student's current district may be required to confirm good standing prior to acceptance.

All eligible nonresident students who completed the application process following the district's guidelines but were not selected will be notified and informed of the reason they were not accepted for enrollment.
